Empathy Map

The empathy map below captures what a typical PocketSmart AI user says, thinks, does and feels in relation to planning purchases within a budget.

SAYS • “I have only a fixed amount for the whole house, where do I even start?” • “Can someone tell me what fits my budget on Amazon, IKEA or Flipkart?” • “I need a party plan that does not blow my budget.”	THINKS • “If I pick the wrong items I will overspend.” • “There are too many platforms and prices to compare.” • “Will this jewelry match my outfit and still be affordable?”
DOES • Opens several shopping and food apps and compares prices manually. • Asks friends and family for suggestions and reads reviews. • Jots down rough budget splits in notes or a spreadsheet.	FEELS • Overwhelmed by choice and information overload. • Anxious about overspending and making a wrong choice. • Relieved and in control when options are curated within budget.

PRIYA

(Budget-conscious planner: plans home decor, parties and occasion shopping)
