Customer Journey Map

The journey below follows a PocketSmart AI user from first visit to reviewing and reusing a budget plan.

Phase of Journey	Stage 1 Discover & Register	Stage 2 Plan & Get Recommendations	Stage 3 Review, Decide & Revisit
Actions <i>What does the customer do?</i>	- Visits the PocketSmart AI home page and reads about the planners - Reads testimonials - Registers with credentials and logs in	- Chooses Home, Party or Jewelry planner - Enters budget, room / event / occasion details and preferences - Optionally uploads an outfit image (Jewelry) - Submits the form	- Reviews AI-generated recommendation cards with platform links - Compares options and picks items - Opens history / dashboard to revisit or reuse plans
Touchpoint <i>What part of the service do they interact with?</i>	- Home page, testimonials page /register and /login pages - Footer links	- Planner forms (/generate-home, /generate-party, /generate-jewelry) - Gemini-powered recommendation engine	- Recommendation pages - Amazon / Flipkart / IKEA / Swiggy / Zomato / OYO links - Dashboard and /history page
Customer Thought <i>What is the customer thinking?</i>	"Can this really fit my budget?" "Is it easy and safe to sign up?"	"I hope it understands my budget and style." "How long will this take?"	"These options fit my budget." "I can save this plan and come back to it."
Customer Feeling <i>What is the customer feeling?</i>	Curious and slightly sceptical	Hopeful, engaged	Relieved, confident and in control
Process Ownership <i>Who is in the lead on this?</i>	Frontend and Auth modules (FastAPI /register, /login, /token)	Backend and AI module (gemini_utils.py, Gemini API)	Frontend, History and Dashboard modules (/history, /recommendations-details)
Opportunities <i>How can we improve this stage?</i>	- Social sign-in options - Short guided tour of the three planners - Show sample recommendations before signup	- Smart defaults and budget suggestions - Input validation with helpful hints - Faster responses with prompt optimisation	- Live price tracking from platforms - Export / share plans - Personalised insights from history
